Align Technology

Align Technology at the 56th SIDO Congress

From **20 to 22 November**, the **Fortezza da Basso in Florence** will host the **56**th **International SIDO Congress**, a key event for the international orthodontic community. Once again this year, **Align Technology** will be present as the **exclusive Diamond Sponsor**, reaffirming its commitment to leading digital innovation in orthodontics.

The program opens with a highlight: on **Friday, 21 November**, in the prestigious **Sala Volta** (1:00 – 2:00 pm), **Dr. Federico Migliori** and **Dr. Alessandro Greco** will present the workshop entitled "The Future of Orthodontics: from diagnosis to treatment planning in just a few minutes". A topic that perfectly reflects Align's vision: making clinical processes faster, more precise and more efficient through the power of new technologies.

Alongside the scientific sessions, the **Align Technology booth** will be the ideal place to experience the latest innovations in digital orthodontics first-hand. Here, professionals will have the opportunity to exchange ideas, discover practical solutions, and take part in dedicated lectures held during the coffee breaks throughout the three days of the congress.

ALIGN TECHNOLOGY BOOTH LECTURES SCHEDULE:

- Thursday, November 20 | 3:45 PM 4:15 PM
 Convert your patients with new digital tools with Massimiliano Teruzzi, iTero Clinical Manager, and Alessandro Giglio, iTero Clinical Trainer
- Friday, November 21 | 11:15 AM 11:45 AM
 P2P: Peer to Peer. Sharing, learning and progressing together with Dr. Francesca Massetti
- Friday, November 21 | 4:15 PM 4:45 PM

 New mandibular advancement protocols compared: MA vs MAOB with Dr. Andrea Conigliaro
- Saturday, November 22 | 11:00 AM 11:30 AM
 Maxillary expansion in the digital era: IPE and Invisalign First between challenges and opportunities with Dr. Simonetta Meuli

With its rich program and the contribution of experienced clinicians, **Align Technology** confirms its role not only as a technological partner but also as a promoter of knowledge and shared growth.

PLATINUM SPONSORS

Orthonetwork - Smartee

Smartee Italy at the 56th SIDO International Congress

At the upcoming **56th SIDO International Congress**, Smartee invites you to discover a new vision of orthodontics with aligners: a complete system, designed by orthodontists for orthodontists, built to adapt to every patient and every clinical need.

After accurate diagnosis and thoughtful planning, clinicians will find in Smartee all the tools they need to deliver the most suitable solution—without compromise:

- from the traditional Smartee **GE system**,
- to the dedicated **Teen & Kinder** line for growing patients,
- to the exclusive **GS (Gang Shen)** protocols for mandibular repositioning,
- and treatment pathways tailored for patients with OSAS.

Product @ / GS / teen. / kinder

With Smartee, orthodontists don't have to adapt to the system: the system adapts to their therapeutic goals, offering a reliable partner at every stage of the journey.

Moreover, Smartee enriches the patient's experience with unique communication tools, such as official **Disney** and **Marvel** packaging. This detail not only makes treatment more engaging and reassuring for families, but also gives practices a concrete opportunity to stand out in their communication and positioning.

Ti aspettiamo al nostro stand P6 per condividere casi clinici, strumenti digitali e le ultime novità del nostro portale, oggi ancora più intuitivo e progettato per semplificare il lavoro quotidiano del professionista.

Visit us at booth P6 to explore clinical cases, digital tools, and the latest updates from our platform—now even more intuitive and designed to simplify daily practice.

With **Smartee**, aligner orthodontics truly becomes accessible for all ages and all malocclusions.

Target Ortodonzia Clear System Italia

Synergy®: The intelligent evolution of orthodontics

Clear System Italia, an integral part of the Target Ortodonzia Group, is much more than a simple distributor: it's the bridge connecting the American excellence of Rocky Mountain Orthodontics (RMO®) to the heart of Italian orthodontics. Founded in 1933 by Dr. Archie Brusse, a visionary pioneer from Denver, RMO® revolutionized the field by being the first to introduce prefabricated orthodontic appliances, paving the way for a new way of thinking about smiles.

Today, this tradition of innovation continues with **Synergy**[®], an advanced and high-performing orthodontic solution.

Thanks to its rounded and wave-shaped slot, the **Synergy**® system delivers gentler, more continuous force, reducing treatment time and increasing patient comfort.

Key benefits of Synergy® include:

- reduced friction: less resistance during tooth movement;
- shorter treatment time: faster and more efficient movements;
- rounded arch walls: easier archwire insertion without ligatures;
- multiple FSC ligation options: greater control during treatment, tooth by tooth;
- low-profile design: enhanced patient comfort;
- MIM manufacturing: superior strength and smoothness.

CLEAR SYSTEM ITALIA SH

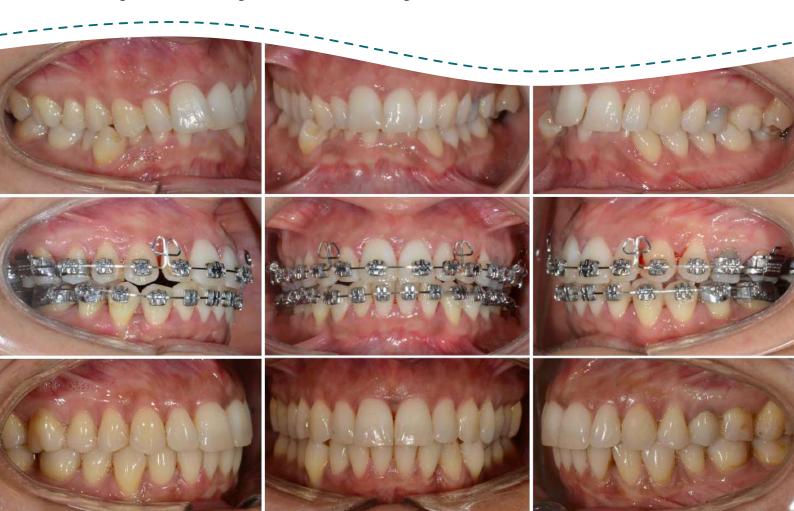

University studies have shown that the **Synergy**® system can significantly reduce friction, appointment intervals, and overall treatment time compared to traditional brackets. This system allows for easier archwire insertion and removal, maximizing treatment effectiveness and reducing the risk of relapse.

Come visit us at the **Target Ortodonzia & Clear System** Italia booth to discover the full potential of **Synergy**®, speak with our experts, and receive dedicated materials.

Synergy® is already a well-established reality. Now is the time to integrate it into your practice.

Leone

The Adòk-made customized elastomer!

Adòk is a tailor-made medical device that represents an evolution compared to common preformed elastomers. Created from the **patient's dental impressions**, it allows the integration of the planning of dental movements into the design of the device, ensuring **comfort**, **adherence**, **and clinical effectiveness**.

This technology translates into an innovative approach of **interceptive pediatric orthodontics**, capable of correcting malocclusions, guiding dento-alveolar growth, and resolving myofunctional disorders such as atypical swallowing, tongue posture, and oral breathing.

Its technical features (indentations, lingual ramp, vestibular shields, and posterior bite blocks) provide three-dimensional control and safe dental movement through biologically calibrated forces.

Digital planning makes Adòk a precise and comfortable device, preventing unwanted movements and ensuring full contact with the dentition.

The use of biocompatible and resistant materials enhances its reliability and safety.

During the congress, at the **Leone booth**, you will have the opportunity to discover the full potential of Adòk and attend the **lecture** "Functional Elastodontics for all ages" by **Dr. Enrica Tessore**, an event dedicated to clinical and scientific insights into the applications of this innovative customized elastomer.

Angel Aligner™

Explore what's new with Angel Aligner at booth P8.

A6 Mandibular Advancement

We celebrate 10 years of our A6 mandibular advancement solution!

- First twin block solution on the market for aligner treatment (2015)
- Directly integrated blocks, no worries about debonding
- Made with Master Control S material; a true multi-layer material
- Choice of trim line in A6

Traditional functional orthodontics usually involves two phases: phase I focuses on orthopaedics and jaw function, while phase II addresses dental alignment and occlusal settlement. The Angel Aligner A6 mandibular advancement solution combines the two phases of orthodontics into one, correcting and aligning misaligned teeth and adjusting the occlusal relationship simultaneously, thereby improving the effectiveness of orthodontics and shortening its duration.

Virtual Roots 2.0: the solution for cases where CBCT is not a possibility

Virtual Roots 2.0 provides enhanced accuracy over traditional root libraries through the integration of panoramic x-rays.

From a standard panoramic x-ray, Angel Aligner's patented algorithm generates patient-specific virtual root visualization, supporting treatment planning without the need for additional scans or radiation exposure.

myAngelSmile App

Encouraging patient compliance for optimal treatment results With the mobile application, your patients can:

- Track daily aligner wear time
- · Receive reminders to put aligners back in
- Check remaining days on current aligner
- · Get reminders to change aligner stage

The myAngelSmile App helps to facilitate patient engagement and supports your patients in following their treatment plan – for better compliance and improved treatment results.

angel aligner™

Virtual Roots 2.0

Your solution for cases where CBCT is not possible

$Ormco^{m}$

Welcome Spark Junior™ and Bitesync™!

Now available! Advanced treatment with customised clear aligners for children and adolescents

Spark™ Junior offers a two-phase clear aligner treatment plan designed specifically for young patients. It supports personalised, continuous orthodontic care from childhood to adulthood, giving patients the Spark smile they will love!

Spark™ BiteSync™ is a Class II correction system included in stages 1 and 2 of Spark Junior and will be available to Spark customers in their DTX account from 1st October.

For every patient

BiteSync™ è is customised to each patient's needs within the Spark software. Simply select the Spark™ BiteSync™ option within the DTX portal, then design and approve the case.

A solution for mixed dentition

The sleek yet robust design ensures the durability, efficiency and flexibility needed to treat children with mixed dentition and adolescents.

We look forward to seeing you at the Ormco stand to give you more information about our new product and to participate in the in-depth sessions prepared by our clinicians and DTS!

GOLD SPONSORS

Società Italiana di Ortadonzia

American Orthodontics

Since 1968, we have been committed to delivering quality and value to orthodontic professionals in over 110 countries, with more than 700 employees dedicated to excellence every day.

At AO you are not just a customer, but a partner: our team – from consultants and customer service to marketing and manufacturing – works to exceed your expectations.

98% of our products are manufactured in our Sheboygan (Wisconsin) facility, under the highest quality standards and international certifications (FDA, UDI, ISO13485:2016, MDR, MDSAP).

GC Orthodontics Ortospecialized

MOV'Aligners: digital innovation for customized orthodontic treatment

MOV'Aligners is the digital solution developed by GC Orthodontics to provide orthodontists with a workflow that is simple, fast, and reliable.

Through the online portal, intraoral scans and clinical documentation can be uploaded, and within 2–4 days an interactive 3D setup proposal is delivered. The material used, Zendura FLX, ensures high elasticity, comfort, and resistance to discoloration, while being **free of BPA and phthalates.**

HIGH-QUALITY TREATMENT MATERIALS

MOV'Aligners is a customized digital aesthetic solution available through GC Orthodontics. We have been providing high-quality products to the global orthodontic market since 2013.

MILE DESIGNE

WHAT IS MOV'ALIGNERS?

Orthodontic alignment solution to make the most of your smile

Once the project is approved, delivery takes place within 14 days directly to the clinic. MOV'Aligners also offers the MOV'Academy program, which supports professionals in complex cases and provides dedicated training to facilitate its use in daily practice.

Different packages (MOV'10, MOV'20, MOV'30, MOV'Advanced) are available, allowing clinicians to choose the most suitable solution according to the number of stages required, with refinements and retainers included.

For more information, visit <u>www.mov-aligners.com</u> and request a free demo to see how MOV'Aligners can enhance the quality of your orthodontic treatments.

Solventum

Revolutionize the way you create attachments!

Go fully digital with your aligner treatments thanks to Clarity™ Precision Grip Attachments and Clarity™ Aligners.

Reduce the time your team spends on manually creating attachments. Eliminate the risk of under or overfilling attachment templates. Achieve the precision you need with the esthetics your patients demand. Clarity™ Precision Grip Attachments are pre-loaded, 3D-printed, fully cured composite attachments that require no composite cleanup.

How accurate are your conventional attachments for aligners?

Eliminate inaccuracies with Clarity™ Precision Grip Attachments and Clarity™

Exclusively available with Clarity™ Aligners through the **Clarity™ Portal**—where you can design and order aligners and attachments in one single solution!

For every Clarity™ Aligner case submitted by December 31st 2025, Clarity™ Precision Grip attachments will be included at no additional cost—so you can experience this perfect combination firsthand.

Come and visit us at during the SIDO at booth G4!

SureSmile®

Do More With SureSmile®: Customized Digital Orthodontics for Every Patient

With SureSmile, you get highly customized treatments and complete clinical control, thanks to advanced **software that supports you at every stage of treatment planning**.

Why Choose SureSmile®

- Predictable and reliable treatment plans.
- Unique flexibility: variable trimline (straight or scalloped), adjustable even during treatment.
- Open and simple workflow: compatible with all intraoral scanners.
- Comfort and compliance: with SureSmile® VPro you can enhance comfort and patient experience.
- Fewer attachments for a more efficient clinical approach.
- 3 out of 4 cases require one refinement or fewer, ensuring greater predictability of results.

Come and meet us at the booth S7!

- Try the SureSmile® Platform with our specialists.
- Scopri gli <u>SureSmile[®] Clear Aligners</u> and SureSmile[®] VPro[™].
- Explore the potential of an integrated digital workflow with PrimeScan 2 e DS Core.

DentalMonitoring

Smarter Workflows. Smarter Orthodontics.

Every year at SIDO, orthodontists like you gather to explore the latest advancements in the industry. This year, DentalMonitoring is proud to share its latest integrations and how they are transforming the way practices run, patients engage, and treatments progress.

Integrations: One Connected Journey

Juggling patient data, switching between platforms, or scheduling unnecessary visits can be overwhelming. At DentalMonitoring we want to make your workflow easier, this is why we've integrated with various Practice Management Systems (PMS) and intraoral scanners, so that a fragmented workflow becomes a smooth, connected journey:

- Patient records update instantly between your PMS and DentalMonitoring.
- Scans and data flow seamlessly.
- You and your team spend less time on administrative work and more time with patients.

We want to provide you peace of mind, knowing your practice runs as smoothly as the treatments you deliver.

Smarter Refinements with SmartSTL

Whenever a patient needs a refinement, traditionally, they'd book an appointment, come in for an intraoral scan, and wait for an updated set of aligners. But with **SmartSTL**, the story changes.

By combining the **initial intraoral scan**, the **current aligner stage STL**, and a **new scan taken at home through DentalMonitoring**, we deliver a production-ready STL file, no extra visit required.

That means:

- You save precious chair time for new cases.
- You can plan refinements ahead, with files ready before the patient even steps through your door.

And with integrations already live for **Smartee**, **Spark Aligners**, **Spark Retainers**, **and Angel Aligner**, SmartSTL is here to make your refinements smarter, faster, and simpler.

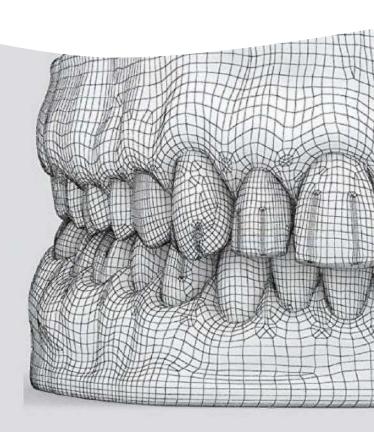

The Future We're Building, Together

At DentalMonitoring, integrations are part of a bigger vision: to give you more control, more efficiency, and more freedom to grow your practice while giving patients the convenience and experience they deserve.

Visit our booth at SIDO to learn more about our integrations, see SmartSTL in action and more!

Ortodontica Italia

Nobrux[®]: The new customized digital bite that requires no chairside adjustment.

The new digital bite is not a simple splint, but a custom gnathological device digitally designed to provide maximum occlusal control and prevent nocturnal dental wear. It fits into the arch with a natural snap, avoiding grinding or relining: simple habitual occlusion impressions are sufficient to activate the CAD/CAM workflow and store the 3D project for perfect replicas at any time.

The device protects against grinding and clenching, relieves occlusal pressure reducing headaches and muscle tension, and enhances compliance thanks to a dedicated maintenance kit. Every detail, including the compact and elegant packaging, has been designed to enrich the patient's experience and strengthen the professional image of the clinic.

Vieni a trovarci presso il Padiglione Spadolini - Stand S1.

SPECIFICHE TECNICHE E PROCESSO DI PRODUZIONE

- 100% digital production, ensuring precise control over thickness, design, and performance, for a perfect fit.
- Digital project reproducible infinitely: the device can be replicated at any time with identical accuracy.
- Exclusive material, comfortable, adaptable, resistant, and biocompatible, with a light blue coloration that delays chromatic deterioration due to ageing.
- Optimal elasticity modulus, ensuring resistance and preventing accidental fractures.
- The new digital bite has undergone strict toxicity tests, with negative results for cytotoxicity, oral irritation, and sensitization. *

* The device does not contain methyldibromo glutaronitrile nor the carba mix components (1,3-diphenylguanidine, zinc diethyldithiocarbamate, dibutyldithiocarbamate). It contains methacrylate monomers and oligomers which, although rarely, may cause allergic reactions in individuals sensitive to acrylic-based products.

Cofidis

Smile without limits

PagoDIL by Cofidis at the 56th SIDO International Congress

At the upcoming 56th SIDO International Congress, Cofidis will be presenting PagoDIL, the innovative payment deferral solution that is transforming the way patients can access dental care. **How often does a patient give up on necessary dental treatment for financial reasons?** With PagoDIL, this obstacle no longer exists. Thanks to its simplicity, speed, and flexibility, dental practices can now offer patients the possibility to spread out payments with complete peace of mind—at no cost and with no interest.

The real breakthrough is the Smile Without Limits promotion, designed to make dental treatment estimates even more accessible while helping dental practices grow as new Cofidis partners.

With PagoDIL 2.1 Smile Without Limits, patients benefit from:

- A first installment postponed by 90 days
- The possibility to spread payments over up to 30 installments
- Zero interest and zero fees for the patient

This means patients can start treatments right away while paying in installments, and the dental practice receives the full amount immediately—without the risk of unpaid bills. For dental practices, PagoDIL by Cofidis is a powerful tool to build patient loyalty, enhance the overall patient experience, and offer complete and timely care. For patients, it guarantees the security of accessing the treatments they need without the immediate financial burden.

During the congress, we will present PagoDIL in detail and explain how it works. The platform is now even more intuitive and specifically designed to simplify the collection process for dental practices

We look forward to welcoming you at our stand!

Discover how to turn the concept of "Smile Without Limits" into a concrete reality for your patients. You can find us at Stand S13, where you will receive personalized advice and all the information you need to introduce PagoDIL in your dental practice.

With PagoDIL, smiles truly have no limits.

FlexiLigner | SoftSmile

Technology, Innovation, and Vision for the Future of Orthodontics

We have formed a strategic partnership with a company specialized in software and AI to integrate automation and clinical quality into a highly efficient workflow. This collaboration represents a step towards a digital ecosystem where automation and quality merge seamlessly. We will also present an innovative communication solution designed to enhance patient dialogue and the presentation of treatment plans.

Visit our booth to discover how FlexiLigner is taking clear orthodontics to the next level.

Complete Solutions for Professionals

FlexiLigner supports dental practices and orthodontists with clear aligners, digital platforms, and dedicated services to improve clinical effectiveness and practice management.

Technology That Makes the Difference

Resiliency® three-layer system for comfort, durability, and precise tooth movements:

- Outer layer: elasticity and comfort
- Middle layer: constant force
- **Inner layer**: stability and strength

High performance for complex treatments, including cases involving mini-screws or patients with TMJ disorders.

KidsLigner

A system designed for children aged 7 to 12 to guide proper dental development and prevent future malocclusions.

Digital Platform

Case management via PC and app:

- Ortho Check®: step-by-step monitoring
- Ortho Tuner®: online plan modification, including integration of Cone Beam files

Training and Support

Free webinars and courses with specialized mentoring.

Marketing and Growth

Promotional materials and management programs to help practices and clinics grow.

Our Experience, Your Success

With over 10 years of experience, FlexiLigner provides tools that combine clinical precision, operational simplicity, and professional support.

Discover all the new features at our booth and make a difference in managing your patients.
